

# How to take an ITI Course

To take an ITI Course you must have a subscription to ITI Courses. Go to [www.ITICourses.com](http://www.ITICourses.com) home page.

The screenshot shows a Windows Internet Explorer browser window displaying the ITI Courses website. The address bar contains the URL <http://development.iticourses.com/index.php>. The website header includes the ITI logo, the text "International Training Institute", and a phone number "Questions? Call 1-877-872-4611". A navigation menu includes links for "About ITI", "Home", "Courses", "Evaluate", "Benefits", "FAQ", and "ACCOUNT". The main content area features a promotional banner for orthodontic exams with the headline "Pass your orthodontic exams the first time." and a sub-headline "Do you need help preparing for your orthodontic assistant exams but don't know where to begin?". The banner includes an image of a hand holding a dental model and a close-up of teeth. Below the banner, there is a section titled "With so many new advancements in the orthodontics field, it's imperative to stay on top of the latest technology and techniques. ITI Courses has been developed to help you pass the following certifications:" followed by a bullet point for the "California Orthodontic Assistant Permit Exam". The text explains that starting January 1, 2010, all California orthodontic assistants are required to get an Orthodontic Assistant Permit and lists 14 courses offered. A link "See all 14 AO Permit courses." is provided. On the right side, there is a logo for the American Association of Orthodontists (AAO) and text stating "ITI is endorsed by the American Association of Orthodontists" and "ITI is a recognized provider of ADA C-E-R-P® Continuing Education Recognition Program".

The background website is for International Training Institute (ITI) Courses. It features a navigation menu with "About ITI", "Benefits", "FAQ", and "ACCOUNT". The main content area includes the text "Pass your ortho exams the first" and "Do you need help preparing assistant exams but don't know". Below this, it states "Look no further than ITI Courses. We are looking to enhance your career programs to help you successfully career as an orthodontic assistant". A section titled "With so many new advancements in the orthodontics field, it's imperative to stay on top of the latest technology and techniques. ITI Courses has been developed to help you pass the following certifications:" lists the "California Orthodontic Assistant Permit Exam". At the bottom right, there is a logo for the American Association of Orthodontists with the text "ITI is endorsed by the American Association of Orthodontists".

# ITI Member Home Page

From the ITI Member Home Page click on the Courses Tab at the top.

The screenshot shows a web browser window with the ITI Member Home Page. The page has a dark blue header with the ITI logo and the text "International Training Institute" and "Questions? Call 1-877-872-4611". Below the header is a navigation bar with several tabs: "About ITI", "Courses", "Evaluate", "Benefits", and "ACCOUNT". The "Courses" tab is highlighted with a red rectangular box, and a mouse cursor is pointing at it. Below the navigation bar, there is a paragraph of text explaining that the user's knowledge profile shows they have not taken pre- or post-tests for the listed courses, and their knowledge level is currently reported as 0. Below this text is a list of 20 courses, each with a bullet point. The courses are listed in two columns. At the bottom of the page, there is a footer with the text "Welcome To Your Account at ITICourses.Com" and a logo for "ADAC·E·R·P" with the text "ITI has been recognized by" above it.

1-Summary

**ADDITIONAL PEOPLE VIEW**  
Please do not blink!  
Be careful that the camera is exactly perpendicular to the patient's profile.

The course covers the uses of digital photographs at the New Patient Exam, for documentation of special concerns, for Progress Records, for Post-treatment documentation, and for enhanced communication with patients, parents, and other practitioners. It also covers the criteria of 9 views in a series of photographs, patient management and positioning, use of retractors and mirrors for intraoral photographs, and detailed production steps for each view.

This course is not camera or photo editing software specific.

The Clinical Photography Course has two checklists and one materials form. Most ITI Courses in which you produce something such as photographs, will have a Criteria Checklist and a Production Checklist.

This will help you learn the criteria of excellent photographs so you will know what you are looking for. The production checklist will teach you exactly each step for producing photos.

Click on the link to the Criteria Checklist.

### 00\_Photography Pretest

Question 1 of 10: Point Value: 10

One method of background illumination that is NOT acceptable because it will produce shadows in the profile view that interfere with the diagnostic acceptability of the view is (select only 1 choice)

- A system of lights and umbrellas that is controlled by a flash and radio slave.
- A light box that is
- A ring light mounted
- Proper positioning
- None of the above.

**Feedback** ✕

Right, this is the correct answer. A ring light does not produce acceptable lighting for the profile view because the ring light produces unacceptable shadows behind the profile.

Score so far: 0 points out of 0

With The Help Of  
**Jan Bell, Northwest Radiography**

Produced By  
The  
**International Training Institute**

You can navigate to other slides in the course and select the content you want to learn. ITI Courses have unique “flash” movies that show you a visual image of the concept while the narrator is discussing the concept with you. Hearing and seeing the concept speeds learning and improves retention. The concepts are reinforced further on the checklists.

The screenshot displays the ITI Training Tools interface for a 'Clinical Photography Course'. The top left shows the course title and progress '( 02:06 / 110:17 )'. Below this is the ITI logo and the slogan 'create happy smiles'. A navigation menu includes 'Outline', 'Thumbnails', 'Notes', and 'Search'. The 'Outline' menu lists 22 items, with item 11, '0106-Video-The New Patient Exam', highlighted by a red box. The main content area shows a slide titled '0002-Photography materials' with a 'Clinical Photography Materials List' containing 16 items, each with an unchecked checkbox:

- digital clinical camera
- camera media card
- batteries or electrical supply
- internal or external flash
- white or light background
- background lighting
- hairclips
- retractors
- lateral or buccal mirrors
- occlusal mirrors
- defogging solution/warm water/heating pad
- dental chair
- card reader
- computer
- photography editing software
- photograph template program
- printer
- photography paper

International Training Institute © 2007

If you just want to scroll through a slide and not listen to the whole thing, you can grab the slider in the slider bar and drag it forward and back to go to a specific section of the movie.

You should take extensive notes when learning this material which will help you retain the information by writing and reading your notes which uses another part of your brain.

Earn 3 CE Credits when scoring 70% or higher.

Most people get nervous when faced with a “test”. With ITI Courses, consider this post-test as feedback on how well you know the material taught in the instruction. The objective here is to pass the test because you know the material well. The objective is not to just pass the test, even if you do not know the material very well.

This test is not timed. You can close it at any time. You can retake it until you pass. If you cannot answer the questions correctly because you do not know the material, go back and learn the material so that you understand it thoroughly and can pass the post-test easily. It does you no good to just pass the test by guessing. When you are faced with performing the procedure on a patient you want to know exactly what you are doing so you can do it well.

Click Continue to start the test.

Many questions have multiple responses. For those questions, click all correct responses and then click Submit. The answers are not provided on post-tests. The questions and responses are scrambled so that you are less likely to memorize the answers.

**Clinical Photography Post-test**

Question 2 of 20: Point Value: 5

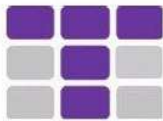

Fog on a mirror (Click all that are correct)

- is not a problem in intraoral photography.
- can be prevented by coating the mirror with anti-fogging solution such as Butler Clear Dip.
- can be prevented by heating the mirror in warm water.
- can be prevented by heating a mirror in a special heating pad.
- can be prevented by blowing air on the mirror as the view is taken.
- is caused from the patient's warm breath condensing moisture on a cold mirror.

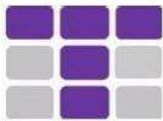

Score so far: 5 points out of 5 (100%)

When you pass the post-test with a score of 70% or more, a CE Certificate will pop up. You should print this CE Certificate and keep it as documentation that you have passed this course. The certificate will also be kept in your Knowledge Management Reports. Close the CE Certificate to go back to the Course Tab page.
