NATA Preparation

NATA is designed in such a manner that prior tutelage is not required. COA-NIASA is aware that candidates will have no or minimal knowledge of architecture. NATA measures aptitude of the candidate in his / her aesthetic sensibilities (3D visualisation, logical understanding, etc.) and drawing skills that are in-built in every candidate and developed right from childhood to the present day. There will be certain questions on architectural awareness wherein candidates may be required to identify building of national or international importance.

The candidate is expected to know about these structures through General Knowledge. The candidate may also prefer to update his knowledge on this by some reading, internet browsing or even by talking to architectural students, architects and other knowledgeable persons. In all probability, this will not be required.

There will be a model NATA interface available on the NATA website to help candidates get acquainted with the visual format of the test. There will be no model questions available as such. The language medium of the test will be English. Minimal computer skills are required (pointing and clicking Mouse buttons).
