### GENERAL ENGLISH

*Directions (Qs. 1 to 15):* Read the following passage carefully and answer the questions given below it. Certain words /Phrases have been printed in bold to help you locate them while answering some of the questions.

Once upon a time there lived a vicious king, Raja Shankara – Short-tempered and temperamental. "God I am", he said to his image as he staed into the mirror everyday, many times a day. He was obsessed with himself. He loved no one but himself. He was blinded towards the injustice in his kingdom because he had little time for his subjects. He wasted most of his time in pouring milk and honey over himself.

Interruption in his possessed life was dealt with Stern reprimanding and sometimes on petty issues he would behead his servants. Provoked by his evil advisor Twishar, he went on with his self indulged life, unaware of the plot his very devoted advisor was planning. A plot to dethrone the king, rule the kingdom with his wicked ways only to harness wealth and the reputation of a king.

One morning the king was on his usual morning horseback rounds but returned to the palace with an intense look on his face. He locked himself inside his palatial room only to unlock it at sundown. Just as the doors cracked open and Raja Shankara emerged from it, his wife rushed to embrace him. She feared a damaging incident had occurred.

The king spoke seldom that day and awoke the next day to make a proclamation to his servants and subjects. The whole kingdom feared what was in store for them from their angry king. But to their surprise he said to all gathered, "from now on I will be a different king. A softer and a patient king."

True to his words from that day on the kind had truly turned on a new leaf; he cleaned out the corruption and injustice in a tender manner with punishments aimed to renew the person from within.

One fine day his evil advisor gathered courage to ask the reason for his paradigm shift. And the kind answered. When I went on horseback that morning a month ago. I noticed a dog brutally chasing a cat. The cat managed to sneak into a hole only after the dog bit her leg, maiming her for life. No far, the dog barked at a farmer who picked up a sharp stone and hit it straight in the dog's eye. Bleeding profusely, the dog yelped in pain. As the farmer walked on, he slipped on the edge of the road and broke his head.

All this happened in a matter of minutes before me and then I realised that evil begets evil. I thought about it deeply and was ready to give up my wordly life for the betterment of my subjects. I wanted to give up evil in me as I did not want evil to encounter me.

Sniggering away the immoral advisor thought what a perfect time it was to dethrone the king, because the Raja had grown kind hearted and patient and would not endeavour a combat. Thinking how he would plan his attack, he stumbled over a step that took him hurling down the remaining steps, bringing his stop with a crack. He howled in pain only to discover he had broken the bones in both his legs.

## ENGLISH LANGUAGE

*Directions (Q. 41 – 55): Read the following passage carefully and answer the questions given below it. Certain words have been printed in bold to help you locate them while answering some of the questions.*

Indeed, the western recession is really the beginning of good news for India! But to understand that we will have to move, away for a while from the topic of western recession... to the Japanese recession! For years, the Japanese style of management has been admired. However, over the last decade or so, one **key** question has sprung up, 'If Japanese management style is as wonderful as described, then why has Japan been in a recession for more than a decade?'

The answer to this question is very simple. Culture plays a very important part in shaping up economies. What succeeds in one culture fails in another. The Japanese are basically non materialistic. And however rich they become, unlike others, they cannot just keep throwing and buying endlessly. And once they have everything they need, there is a saturation point. It was only when companies like Toyota realised that they cannot keep selling cars endlessly to their home market that they went really **aggressive** in the western markets – and the rest is history. Japanese companies grew bigger by catering to the world markets when their home markets shrunk.

And the markets have to shrink finally after attaining a level of affluence! And that's great for the world because the earth needs sustainable development. It does not need monstrous consumers, who keep consuming at the cost of the environment and the earth. There should be limits to growth so that consumers: are not converted into material dustbins for the profit of a handful of corporations.

Owing to the materialistic culture elsewhere, it was possible to keep selling newer products to the consumers despite having existing ones which served equally well. They were lured through advertising and marketing techniques of 'dustbinisation' of the customer; and then finally, once they became ready customers, they were given loans and credits to help them buy more and more. When all the credit worthy people

were given loans to a logical limit, they ceased to be a part of the market. Even this would have been understandable if it could work as an eye-opener. Instead of taking the 'Right Step' as Toyota did, they preferred to take a 'short cut'. Now banks went to the non-creditworthy people and gave them loans. The people expectedly defaulted and the entire system collapsed.

Now, like Toyota, western companies will learn to find new markets. They will now lean towards India because of its common man! The billion-plus population in the next 25 years will become a **consuming** middle class. Finally, the world's attention will shift to the developing world. Finally, there will be a real **surge** in the income of these people and in the next fifty odd years, one can really hope to see an equal world in terms of material plenty, with poverty being almost nonexistent! And this will happen not by selling more cars to the Americans and the Europeans. It will happen by creating markets in India, China, latin America and Africa, by giving their people purchasing power, and by making products for them.

The recession has made us realise that it is not because of worse management techniques, but because of limits to growth. And they will realise that it is great for Planet Earth. After all, how many cars and houses must the rich own before calling it enough? It's time for them to look at others as well. Many years back, to increase his own profits, Henry Ford had started paying his workers more, so that they could buy his cars. In a similar fashion, now the developed world will pay the people of the developing world so that they can buy their cars and washing machines.

The recession will kick-start the process of making the entire world more **prosperous**, and lay the foundation of limits to growth in the west and the foundation of real globalisation in the world – the globalisation of prosperity. And one of its first beneficiaries will be India!

**41.** What does the author mean by the "Right Step" in the passage?

- 1) Giving loans to creditworthy people only.
- 2) Considering market growth along with environment protection.
- 3) Restricting people to buy only such products as are needed by them.
- 4) To start looking at newer avenues and markets.
- 5) None of these.

49. How does the author foresee the future globalisation as an analogy to Henry Ford's example?

- A. Car companies would start selling cars in developing countries as well.
