## **1. Concept of Open University**

An open learning system is one in which the onus of learning is primarily on the students. Despite this, they are formally enrolled in a system which takes in other learners too. Thus, we draw a line of distinction between the above-mentioned category of students and (a) those borrowing books from Libraries and (b) those formally attached to a conventional university where classroom teaching is the principal mode of instruction.

The Open University represents an alternative approach to higher learning. It stands apart from a highly formal, institutionalized and centrally administered system of education. Its philosophy is built around the principles of universality, flexibility and innovativeness. Its ideas and institutions, its methods and procedures are all shaped accordingly. Conceptually, it can be viewed as a system drawing upon the best elements in formal and non-formal education.

The 'openness' consists of a variety of features. First, it offers easy access to the learners. The entry requirement is not too exacting. A genuine interest in picking up knowledge is all that it expects. Consequently, it would try to embrace as many learners as possible.

Second, its territorial reach is visibly wide. It aims at bringing education to the doorstep of the learner, wherever he or she may be. Various methods of communication and contact are used for this purpose. The classroom of the university, thus, is as wide as the entire land it seeks to serve.

Third, the Open University is learner-oriented. It devises its course and methods of teaching to suit the needs of the learners. Their options and inclinations are given due priorities. A variety of courses – short-term or long-term, liberal or professional – can be pursued under the university.

Fourth, it believes in fair distribution of quality education, teaching aid, consultancy and study materials. Whatever resources the university has are made evenly available to all learners wherever or whoever he or she might be. It eliminates variations and discrimination.

Fifth, its administration is decentralized. In promoting Distance Education, the university creates a wide network of Study Centres. Students need only to come to the nearest available centre for collecting all information, completing all formalities, discussing their academic issues and appearing for evaluation of their work at intervals chosen by them.

Sixth, student assessment under Open University is based on continuous assessment and credit system. It does not require students to get bogged down in one final examination. One can study at one's own pace.

In short, the Open University seeks to open up the treasure house of knowledge to the maximum number of users. Thereby it would enhance their skills for productivity and further learning. Socially, too, the university promises steady empowerment of those who suffered backwardness for want of these skills. Considering the current trends all over the world, the Open University is going not only to complement the conventional system of higher education but may soon occupy the centre stage also in developing countries where the resources do not measure up to the vastness of the clientele.

## **2. Vision and Mission of Netaji Subhas Open University**

### **Vision :**

### **7.13. Diploma in Safety Skills & Security Management**

With economy of India growing like never before and many multinational companies bringing money, establishing their offices, business houses, enterprises and industry in India, there is need to provide good, stable and secure social environment. To address their safety concerns and requirements is the need of the hour. Police looks after the law and order situation in civil life in general. But with increasing demands for specialized security personnel in industry, business undertakings as well as at private level, there is a need of an established system for providing training to the unemployed youth, grooming them to take up jobs in security sector. Such trained youth can fill in the void that is present in our system earning their livelihood respectably and also playing a constructive role in society. This will also help in improving the workings and standards of the security agencies hiring such trainees.

The need for giving emphasis on the Skills Development, especially for the less educated, poor and out of school youth has been highlighted in various forums. The skill level and educational attainment of the work force determines the productivity, income levels as well as the adaptability of the working class in changing environment. Large percentage of population in India is living below poverty line. One of the important causes is lower percentage of skilled persons in the workforce.

#### **Methodology**

The training methods to be used should be appropriate to the development of competencies. The focus of the programme is on “performing” and not on “Knowing”. Lecturing will be restricted to the minimum necessary and emphasis to be given for “hands on training”. The training methods will be individual centered to make each person a competent one. Opportunities for individual work will be provided. The learning process will be continuously monitored and feedback will be provided on individual basis.

Demonstrations using different models, audio visual aids and equipment will be used intensively.

## **7.15. Diploma in Fitness Management**

The Diploma course is being conducted in association with the Mantra Institute of Health & Fitness Management, Dumdum, Chiriamore, Kolkata-2.

Fitness and wellness industry in India, unlike developed countries, are dominated and dictated by quacks or untrained or half trained so call fitness personnel who has no formal training, education and certification from recognised bodies in imparting fitness training to consumers in line with the fitness standard followed elsewhere. As a result, in many cases consumers fail to receive the value for money and the benefits they deserve for the time, effort and money invested by them. Therefore, there is tremendous scope and opportunities for trained professionals to meet the rising demand of the industry and the market needs more and more trained and educated fitness professionals.

Analysing and surveying the gap of demand of proper trained personnel and lack of enough such properly qualified trainers in the market, the objective is to provide the market with adequate number of fitness professionals.

## 7.20. Certificate in Foreign Language

With the Increasing trade ties, there is an expanding need for foreign language experts especially in French, German, Italian, Spanish, Chinese and Japanese. With globalization of Indian economy, multinationals coming to India and more and more Indian companies are going for joint ventures, so we need, translation, interpretation, tourist guides, and fields like advertising, IT, Finance, hotels, Entertainment, Public Relations, Mass Communication, Business Process Outsourcing, Embassies and Publishing knowing different languages will be surely a plus point. English is enough to purchase a foreign product or service, but when it comes to selling in a foreign country, it is necessary to know the relevant language. If the sales person speaks to the buyer in his mother tongue, the client connects better to the product. In an increasingly globalized world, knowing a **foreign language** helps to add that extra line to one's resume. It also makes an individual appear to be more accommodative to prospective employers.

The market scope of a foreign language skill is virtually endless. Infinite job opportunities in diverse fields open up for a person who is conversant in a foreign language - be it the technology industry (where one needs to regularly interact with offshore clients/ counterparts) or the BPO sector (where one is required to interact with culturally diverse people) or Trade Industry (which involves imports/exports these days considering India's 'global economy' model). Language being the main obstacle (when lack it) and, at the same time, the main instrument (when we own it) in understanding the people of other countries and cultures. The University in association with Cucchiario d'Argento (Centre for Language & Culture) has launched the certificate course in Foreign Language in the following languages to bridge the gap of language specialist in the specified area.

**i) German Language, ii) Spanish Language, iii) French Language, iv) Italian Language and v) Chinese Language vi) Arabic.**

The paper 1 & 4 are compulsory for all students. A student may opt for any one of the foreign languages from the above list.

## 9. Student Support Services

The university provides its students with self Instructional Materials (SIM) to be studied and learnt by them at their convenience. The university provides various student-support services through a network of study centres. These centres cover all the districts of the State and are located at convenient points connected by public transport. A study centre is placed under the supervision of a coordinator assisted by the staff of his office. It provides all information including prospectus and application forms for enrolment.

At the beginning of each session, study centres invite the students for an induction meeting where they are familiarized with the aims, objectives and activities of the university and the methodology of distance education.

The study centres draw schedules of counselling sessions and notify the same for the students. Normally, the counselling sessions are held during weekends and periods of vacation of the host institutions.

Study centres distribute the home assignment papers received from the university and arrange for their evaluation.

Prospectus, Information, Assignments etc. are not issued by the Headquarters. Students should contact the study centres for all their requirements.

The study centres (not home centres) also arrange for holding of examinations in accordance with the schedule fixed by the university from time to time.

In short, each study centre acts as the day-to-day link between the students and the university. Students are expected to conduct themselves in a worthy and dignified manner to maintain high academic and moral standards.
