**Conditions**

- If both the first and the last elements are vowels, the codes for the vowels are to be interchanged.
- If the group of elements contains a single vowel, that vowel is to be coded as the code for the element following it.

**Directions (41-45) :** In each of these questions there are two sets of figures. The figures on the left are Problem Figures (four figures and one question-marked space) and those on the right are Answer Figures indicated by numbers 1, 2, 3, 4 and 5. A series is established if one of the five Answer Figures is placed at the "question-marked space". Question Figures form a series if they change from left to right according to some rule. The number of the Answer Figure which should be placed in the question-marked space is the answer. All the five figures i.e. four Problem Figures and one Answer Figure placed in the question-marked space should be considered as forming the series.

**Directions (151-165) :** Read the following passage carefully and answer the questions given below it. Certain words are printed in bold to help you locate them while answering some of the questions.

The Sun, while going on his daily rounds saw a princess and fell in love with her. Whenever he could slip away from the heavens he would take human form and go down to the princess to spend some time with her. The princess too became quite fond of him and would wait for him to come. One day the Sun decided to send her a blood-red ruby as a token of his love for her. He put the gem in a silk bag, and calling a crow that was flying past, naked the bird to deliver the gem to his beloved. Crows had milky white feathers

in those days and it was considered auspicious if a crow came anywhere near you. So the Sun was pleased that he had found a crow to deliver the gem. As the crow sped through the sky with the silken bag, the aroma of food lured him. Looking down the crow saw that a wedding feast was in progress, and immediately it was distracted from its mission. Food was one thing it could never resist!

Alighting on a tree nearby, it hung the bag on a twig and went off to find some food. While the crow was feasting, a merchant passing by saw the bag on the tree, and knocked it down with a pole. When he opened the bag and saw its contents he almost swooned in joy. Quickly pocketing the ruby, he filled the bag with dry cow dung that was lying there, and then deftly returned the bag to the branch. It was all done so quickly that the crow missed all the action. After having its fill, it flew up to the tree, and picking up the bag took it to the person it was intended for. The princess was in the garden. When the crow gave her the bag, she took it eagerly, knowing that it was from the Sun. But when she saw its contents she reeled back in shock and anger. Believing that it was the Sun's way of telling her that he did not care for her, she flung the bag away, rushed to her palace, and never came out again. When the Sun learnt of what had happened he was furious. So great was his anger that when he turned his scorching gaze on the crow, its feathers were burned black. Its feathers have been black ever since. The ruby did not stay with the man who stole it. It fell out of his pocket and rolled into a deep pit. Men have been trying to dig it out ever since. Many precious stones have been found in the process, making Myanmar one of the richest sources of rubies and sapphires, but the ruby that the Sun sent to the princess is yet to be found.

Once upon a time there lived a peacock and a tortoise in close prox-

imity and they became the best of friends. The peacock lived on a tree on the [191] of a stream which was the home of the tortoises. It was a daily [192] for the peacock to dance near the stream after he had a drink of water. He would display his great plumage for the amusement of his friend. One unfortunate day, a bird-catcher who was on the [193] caught the peacock and was about to take him away to the market. The unhappy bird begged his captor to allow him to bid his friend the tortoise good-bye, as it would be the [194] time he would see him. The bird-catcher gave in to his request and took him to the tortoise. The tortoise was in tears to see his friend held [195].

The tortoise asked the bird-catcher to let the peacock go; but he laughed at the request, saying that it was his means of livelihood. The tortoise then said, "If I give you an expensive present, will you let my friend go?" "Certainly," answered the bird-catcher. Whereupon, the tortoise (106) into the water and in a few seconds came up with a handsome pearl, which he presented to the birdcatcher. This was beyond the man's expectations, and he let the peacock go immediately. A short time after, the bird-catcher came back and told the tortoise that he thought he had not paid enough for the release of his friend, and (107), that unless a match to the pearl was obtained for him, he would catch the peacock again. The tortoise, who had already (108) his friend to shift to a distant jungle on being set free, was greatly (109) by the greed of the bird - catcher. "Well," said the tortoise, "If you insist on having another pearl like the one I gave you, give it back to me and I will fish you an exact match for it." The greediness of the bird-catcher prevented his reasoning and he (200) gave the pearl to the clever tortoise. The tortoise swam out with it saying, "I am no fool to give you another pearl, your greediness has left you with nothing.
