

be performed first? Response: d + e b * y a + (b * y) Below are few basic questions that can be expected on TCS interviews. These are not hard to answer but a good preparation is necessary so that you don't miss any. Interview Question 1: 1) What is the prime difference between while and Do While Loop? Answer: Though while and do-while are loop statements, in Do While it is assured that the statements within the loop will be executed at least once (even if the condition fails.) Interview Question 2: 2) What is the difference between a = ++b and a = b++? Answer: The first statement a = ++b can be broken down into two statements b = b + 1 followed by a = b + 1. Hence b will be assigned to a. Only after this assignment b will be incremented. Hence values of a and b will be different at the end. Interview Question 3: 3) A C program is compiled into native (binary) code by the compiler. Similarly what will be generated out of JAVA program source by JAVA compile? Nawser: JAVA program will get compiled into byte code instead of native (binary) code. Interview Question 4: Farctice Question For Your Thought : Given a for statement for(i = 1; < 10; ++) ({ print("hello"); } Mow you can try by yourself rewriting the same logic using while statement.
