Read the following passage carefully and answer the questions that follow :

Forests are the most important sources of natural wealth covering one fifth of the country's land area. They supply the timber for the railways, house building, furniture making, fuel for cooking etc.

Medical herbs also come from the forests. Unfortunately, forests are being cut down. Deforestation has resulted in air pollution, soil erosion and ground water pollution. We must therefore protect and develop forests.

Vanamahotsava is an important step in this direction. It is observed for a week in July every year. During this week lakhs of saplings are planted throughout the country. This is being done to restore our fast disappearing forests.
