

## IBM Technical Test Paper 3

1. `int i=10;`  
`printf("%d%d%d",i,i++,++i);`  
ans: compiler dependent
2. `printf("Enter two values a and b:");`  
`scanf("%d%d",a,b);`  
`printf("%d+%d=%d",a,b,a+b);`  
ans:core dumped
3. question on WM\_SIZE  
ans:WM\_SIZE
4. when destroy window what message would display  
ans:WM\_DESTROY
5. S Windows 3.1 about multitasking  
ans:nonpreemptive
6. windows 3.1 is  
ans:application
7. about switch statement  
ans:16,21
8. question paper the first question ans is  
ans:can't be compiled
9. about send messages and post messages  
ans: c
- 10.what is the command to initiate the windows  
ans:WinMain
- 11.`const char *`  
`char * const`  
What is the difference between the above two?.
- 12.In Unix inter process communication take place using?.
- 13.What are the files in /etc directory?.
- 14.About inode numbers
- 15.Max relaxable permission value without giving write permission to others?
- 16.About ln(linking)

17. A question on until  
until (who |grep mary)  
do  
sleep(60)  
done
18. Linking across directories?.
19. process id for kernel process
20. very first process created by kernel
21. function to repaint a window immediately?.
22. Function entry for DLL in win3.1
23. win 3.1 supports which type of multi tasking?.
24. Message displayed when a window is destroyed
25. About fork()?
26. About send message and post message
27. Message to limit the size of window
28. System call executable binary file into a process
29. About GDI object?.
30. API used to hide window
31. Initialize contents of a dialog?.
