

Which of the following statements is false?

- a) Pointers are designed for storing memory addresses
- b) Arrays are passed by value to functions
- c) Both of the above are false

Answer: Both of the above are false

Which of the following statements is true regarding static variables?

- a) Which of the following statements is true regarding static variables?
- b) Only local variables can be defined as static variables
- c) Scope and life of global variables is limited to the function to which they are declared

Answer: Both local and global variables can be defined as static variables

-----stores a log of changes made to db, which are then written to __, which are then written to

__, which is used if db recovery is necc.

- a) db buffer share pool
- b) program global area, shared pool
- c) system global area, large pool
- d) redo log buffer, online redo log

Download question papers from <http://QuestionPaper.in> Question Paper is a fastest growing educational portal in India, providing educational content for CBSE, state boards and various entrance/competitive exams. We have largest collection of past and model question papers. Most of these question papers are contributed from our users.

----means allowing objects of difference types to be considered as examples of a higher level set :

ans: Generalization

The primary characteristic of key field is that it must be unique

Manager----- --emp managed by ans:one of many recursive relationship

If a member initialiser is not provided for a member object of a class .The object - is called

- a) static fn
- b) non static fn
- c) default constructor
- d) none

```
class constest
{
private:
const int i;
public:
constest():i(10)
}
```

Inheritance

In a file A...Z characters are written.if we open the file using fopen and

```
lseek(fp,-10,2);
```

```
c=getc(fp);
```

```
printf("%c",c);
```

what will be the output.?

Ans . Y.(please verify Here last parameter is the integer value to seek_end

Same question with

```
lseek(fp,10,0);
```

```
c=getc(fp);
```

```
printf("%c",c);
```

ans. 11th character will be printed "K" verify.

Theory question about far pointers.

Hint: Far pointers are 4 bytes in size and local pointers are 2 bytes in size.

important: i saw in

a previous question paper of accenture which is in the chetana database, some lady wrote that size

of an integer in C is 2 bytes and for C++ it is 4 bytes. This is absurd.The size of types is

QuestionPaper.in

Your key towards success.....

entirely dependent on the compiler used. for DOS Turbo C sizeof int is 2 and float is 4 bytes for

windows borland C,C++ size of int is 4 bytes for linux gcc, size of int is 2 bytes. All these

depends on the Operating system. Please keep this in mind.

Now some questions about extern variables.

```
#include<stdio.h>
main()
{
char str[]={ "hell" };
int i;
for(i=0;i<5;i++)
printf("%c%c%c%c\n",str[i],i[str],*(str+i),*(i+str));
getch();
}
ans.
hhhh
eeee
llll
llll
```

Download question papers from <http://QuestionPaper.in> Question Paper is a fastest growing educational portal in India, providing educational content for CBSE, state boards and various entrance/competitive exams. QuestionPaper.in provides platform to students, teachers and parents to interact with other users and share their knowledge and experience. We have largest collection of past and model question papers. Most of these question papers are contributed from our users.

note that `str[i]` and `i[str]` are the same. in the question paper, the original word is "hello".

Which of the following is not defined in `string.h` `strtod`, `memchr`, `strspn`, `strchr`
ans . `strtod`. (defined in `STDLIB.H`) it is used to convert a string to double.

Questions on macros with arguments .same pattern given in TEST UR C SKILLS

eg. `#define SQUARE(x) x*x`

```
main()
```

```
{
```

```
.....
```

```
y=SQUARE(2+3);
```

```
printf("%d",y);
```

```
}
```

ans. when the macro expands we get $2+3*2+3 = 2+6+3 = 11$. 11 is the correct answer not 25.

Remember an inline function does type checking and so it is better than a macro a question on this.

Some memory is allocated using `memalloc` and then `realloc` is called. and now to write the size of

the variable. better learn `memalloc` and `realloc`. what it does and syntax.

1. data model is

We have largest collection of past and model question papers. Most of these question papers are contributed from our users.

a) Entity b) Constraints c) Entity relationship d) All the above

ans:- c

2. Choose the correct one select emp.name ,emp.age from emp1,emp2 where emp.sno = 456;

a) cluster b) non-cluster c) index d) none of these

3. What is index?

a) atrendum selectio of colum

ans) a

4. Match the following

1- one to one a) manager to employ

2- one to many b) employ to employ

3- many to one c) unique object

4- many to many d) employ to manager

a) 1-a ,2-b ,3-c,4-d b) 1-c,2-d,3-a,4-b c) 1-c,2-a,3-d,4-b d) 1-d,2-b,3-a,4-c ans) c

5.

1 max 222

2 allen 333

3 rony 444

Select first.name from first where first.age = (select first.age from first where first.sno = 3);

Download question papers from <http://QuestionPaper.in> Question Paper is a fastest growing educational portal in India, providing educational content for CBSE, state boards and various entrance/competitive exams. We have largest collection of past and model question papers. Most of these question papers are contributed from our users.

9. Write a program to find the Factorial of a number.
10. Write a program to generate the Fibonacci Series.
11. Searching and sorting algorithms with complexities.

1. Study the Following Points:

- a. One Cannot Take the address of a Bit Field
- b. bit fields cannot be arrayed
- c. Bit-Fields are machine Dependant
- d. Bit-fields cannot be declared as static

Which of the Following Statements are true w.r.t Bit-Fields

- A) a, b & c B) Only a & b C) Only c D) All

2. What is the function of `ceil(X)` defined in `math.h` do?

- A) It returns the value rounded down to the next lower integer
- B) It returns the value rounded up to the next higher integer
- C) the Next Higher Value
- D) the next lower value

3. When do you say that a digraph is acyclic

- A) if and only if its first search does not have back arcs
- B) a digraph is acyclic if and only if its first search does not have back vertices

Download question papers from <http://QuestionPaper.in> Question Paper is a fastest growing educational portal in India, providing educational content for CBSE, state boards and various entrance/competitive exams. QuestionPaper.in provides platform to students, teachers and parents to interact with other users and share their knowledge and experience. We have largest collection of past and model question papers. Most of these question papers are contributed from our users.

- C)if and only if its first search does not have same dfnumber
- D)None of these

4.A function 'q' that accepts a pointer to a character as argument and returns a pointer to an

array of integer can be declared as:

- A)int (*q(char*)) []
- B)int *q(char*) []
- C)int(*q)(char*) []
- D)None of the Above

5.What kind of sorting is this:

`SORT (k,n)`

`1.[Loop on I Index]`

`repeat thru step2 for i=1,2,.....n-1`

`2.[For each pass,get small value]`

`min=i;`

`repeat for j=i+1 to N do`

`{`

`if K[j]`

`min=j;`

`}`

`temp=K[i];K[i]=K[min];K[min]=temp;`

Download question papers from <http://QuestionPaper.in> Question Paper is a fastest growing educational portal in India, providing educational content for CBSE, state boards and various entrance/competitive exams. QuestionPaper.in provides platform to students, teachers and parents to interact with other users and share their knowledge and experience. We have largest collection of past and model question papers. Most of these question papers are contributed from our users.

3.[Sorted Values will be returned]

- A)Bubble Sort
- B)Quick Sort
- C)Selection Sort
- D)Merge Sort

6.Which of the Following is not defined in string.h?

- A)strspn()
- B)strerror()
- C)memchr()
- D)strod()

7.Identify the correct argument for the function call fflush() in ANSI C:

- A)stdout
- B)stdin
- C)stderr
- D)All the above

8.Which of the Following will define a type NODE that is a node in a Linked list?

- A)struct node {NODE*next;int x;};type def struct node NODE;
- B)typedef struct NODE {struct NODE *next;int x;};
- C)typedef struct NODE {NODE *next;int x;};

Download question papers from <http://QuestionPaper.in> Question Paper is a fastest growing educational portal in India, providing educational content for CBSE, state boards and various entrance/competitive exams. QuestionPaper.in provides platform to students, teachers and parents to interact with other users and share their knowledge and experience. We have largest collection of past and model question papers. Most of these question papers are contributed from our users.

D)typedef struct {NODE *next;int x;}NODE;

9.Which of these statements are false w.r.t File Functions?

i) fputs() ii) fdopen() iii) fgetpos() iv) ferror()

A)ii B)i,ii C)iii D)iv

10.Study the code:

```
void show()
```

```
main()
```

```
{
```

```
show();
```

```
}
```

```
void show (char *s)
```

```
{
```

```
printf("%sn",s);
```

```
}
```

What will happen if it is compiled & run on an ANSI C Compiler?

A)It will compile & nothing will be printed when it is executed

B)it will compile but not link

C)the compiler will generate an error

D)the compiler will generate a warning

11. Look at the Code:

```
#include  
  
void main()  
{  
char s1[]="abcd";  
char s2[10];  
char s3[]="efgh";  
int i;  
clrscr();  
i=strcmp(strcat(s3,ctrcpy(s2,s1))strcat(s3,"abcd"));  
printf("%d",i);  
}
```

What will be the output?

A) No output B) A Non Integer C) 0 D) Garbage

12. Look at the Code:

```
main()  
{  
int a[]={1,2,3},i;  
for(i=0;i<3;i++)  
{  
printf("%d",*a);  
a++;  
}
```

Download question papers from <http://QuestionPaper.in> Question Paper is a fastest growing educational portal in India, providing educational content for CBSE, state boards and various entrance/competitive exams. QuestionPaper.in provides platform to students, teachers and parents to interact with other users and share their knowledge and experience. ```
}
```

```
}
```

Which Statement is/are True w.r.t the above code?

I.Executes Successfully & Prints the contents of the array

II.Gives the Error:Lvalue Required

III.The address of the array should not be changed

IV.None of the Above.

A)Only I B)Only II C)II & III D)IV

13.what is the output?

```
#define fun(a,b,t) (g ##t=(a),(a)=(b),(b)=g##t)
```

```
float gfloat;
```

```
main()
```

```
{
```

```
float a=1.12,b=3.14;
```

```
fun (a,b,float);
```

```
printf("na=%4.2f,b=%4.2f",a,b);
```

```
}
```

A)Error in Defining Macro

B)a=1.12,b=3.14

C)a=3.14,b=1.12
