

Wipro Infotech Fresher Job Interview Placement Paper Pattern (Aptitude, Essay, Technical & Interview) 2010

Wipro Infotech Fresher Job Interview Placement Paper Patter (Aptitude, Essay, Technical & Interview)

Company Name : Wipro Infotech

Type : Fresher, Job Interview

No. of rounds: 4

1: Aptitude test

2: Essay writing

3: Technical Interview

4: HR interview

The above pattern is the latest followed by Wipro Recruitment Team. The Aptitude Test is conducted online on the computer so there are very less chances of any error creeping in. The test was conducted in 4 slots with around 70 students in one slot. The interface was clean and smooth with excellent work from the coordinators in carrying out the test.

1: Aptitude test: It had 3 sections namely verbal ability, quantitative apti, technical knowledge.

Verbal: 15 Questions

Quantitative: 15 Question

Technical: 20 Questions

Test Duration: 60min

Verbal had simple english ques, passage based ques, synonyms, antonyms, phrases, fill in the blanks etc. Completed this section in around 15 minutes since the questions were very very simple. Quantitative had questions from time speed distance, logical thinking, blood relationship etc. Can't remember more.... However this section was also easy and completed it in around 15-20 minutes. Just brush up your concepts and general formulae and you will be fine with it.

Technical was the toughest section with questions on c, c++ , java, Operating System, and unix / linux ques. Some questions from Unix were way over the top but the trick is to clear the cutoff which lies around 10-12 marks in technical. You can easily score that much if you can do c, c++, java and maybe OS.

2: Essay writing:

Duration: 10min

They consider only text written on front side of the A4 paper. This seems to be a mere formality to check your arrangement of ideas and there representation. My topic was "College Politics"

3: Technical Interview: The technical interview went for around 20-25 minutes with questions ranging

from your project, training information, your favourite subject. The questions were majorly easy and simple to answer instead of the difficult programs and in-depth questions that are asked in some of the interviews.

The questions that they asked apart from technical ones were- are you ready to relocate anywhere in India. Can you fill the bond that we were asked to fill once we get placed in Wipro. What are your career aspirations. Show them your confidence....

4: HR INTERVIEW: The final stage of Wipro placement drive. My interview began at 11:15pm. Although I was sleeping at that time but try to maintain your energy...keep a smile on your face :)

My interview was taken by the Head who came with her team from Bangalore. She was nice and friendly. She asked me to tell something about myself which is not in my CV. Then she asked me the most challenging thing I had ever done in my life followed by why should we hire you?

At the end she asked me if I had any questions.

Just be yourself, be confident, CONFIDENCE is the key...Don't forget to remember the almighty and on your day nobody can stop you from achieving your aspirations.. All the best for your placement..... :)
