## Reasoning

This is a test to see how well you can think and also to judge your aptitude/ knowledge for working with computer. It contains questions of various kinds. Here are some sample questions.

Directions : In each of the following questions, there are five letter groups or words in each question. Four of these letter groups or words are alike in some way, while one is different. Find the one which is different.
Q.1. (1) black
(2) red
(3) green
(4) paint
(5) yellow

Of the five, 'black, 'red', 'green' and 'yellow' form a group as they are names of colours. 'paint' is not the name of a colour. Therefore, (4) is the answer.

Now try to solve the following questions.
Q.2. (1) $B C$
(2) MN
(3) PQ
(4) $X Z$
(5) ST
Q.3. (1) Mango

Directions : In each of the following questions, there is a question mark in which only one of the five alternatives given under the question satisfies the same relationship as is found between the two terms to the left of the sign :: given in the question. Find the correct answer.
Q.4. Foot : man : : hoof : ?
(1) leg
(2) dog
(3) horse
(4) boy
(5) shoe

In the above example, 'hoof' has the same relationship with 'horse' as 'foot' has to 'man'. Hence the answer is (3).
Now study to solve the following questions.
Q.5. Day : Night : : Kind : ?

(5) Satyapriya is sometimes dishonest
Q.9. If ' $A$ " $B$ ' means 'add $B$ to $A$ ', ' $A$ ' $B$ ' means 'subtract $B$ from $A$ ', ' $A$ \# $B$ ' means 'divide $A$ by $B$ ' and ' $A * B$ ' means 'multiply $A$ by $B$; which of the following gives the average sales of two days where $S_{1}$ and $S_{2}$ are the sales of the first and the second day respectively?
(1) $\left(S_{1}, S_{2}\right)$ \# 2
(2) $2 \#\left(S_{1} " S_{2}\right)$

(5) None of these
Q.10. Every person above eighteen years of age who is registered as a voter, can vote. To find out whether Madhu, who was born twenty years ago, can vote, which of the following further information is needed?
(I) Madhu's date of birth
(II) Whether Madhu is registered as a voter

(5) Both I and II
Q.11. In each question below are given two statements followed by two conclusions numbered I and II. You have to take the two given statements to be true even if they seem to be at variance from commonly known facts, consider the two conclusions; together and then decide which of the given conclusions logically follows from the two given statements, disregarding commonly known facts.

| Statements | $:$ | I.All machines are windows. All windows are clouds. |
| :--- | :--- | :--- |
| Conclusions | $:$ | I. All machines are clouds. |
|  |  | II.All clouds are machines. |

(1) None follows
(2) Only I follows
(3) Both I \& II follow
(4) Only II follows
(5) Either I or II follows

There may also be problems in the form of figures, designs and drawings. These may be of three types viz. (1) analogies, (2) classification and (3) series.

## 1. Analogies (I) :

Try the following analogy type questions.
Directions : In these questions, there are two sets of figures. The Problem Figures and the Answer Figures. The Problem Figures are presented in two units. The first unit contains two figures and the second unit contains one figure and a question mark in place of the second figure. You have to find out which one of the Answer Figures should be in place of the question mark.
Q. 12.

Look at the first two Problem Figures. The second figure is related to the first figure in a certain way. The elements in the second figure are double the elements in the first figure. The first figure is one square and the second figure is two squares.

The third and fourth figures should have the same relationship as the first and the second have. That means the fourth figure should be double the third figure. The third figure is a circle; so the fourth should be two circles. Answer figure 5 has two circles. Therefore, the answer is 5.
Q.13. à C Ahtu

Study the first and the second figures in the first unit of the Problem Figures. The first figure is made up of three lines and the second figure is made up of four lines. That means the second figure has one line more than the first figure.

The third figure in the second unit has four lines. Therefore, the fourth figure should have five lines. You will find that figure 1 is made up of five lines. Therefore, the answer is 1.

Now attempt the following question.

Analogies (II) :
In each of the following problems a related pair of figures is followed by five numbured pairs of figures. Select the pair that has a relationship similar to that in the original pair. The best answer is to be selected from a group of fairly close choices.

Now study the following problems.

In the problem figure, the right hand element of the figure is related to the left hand element of the figure in a certain way. The right hand element has one side more than the left hand element. The pair in the Answer figure No. 5 has the same relationship i.e. the right hand element of the figure has one side more than the left hand element of the figure. Therefore, ' 5 ' is the answer.
Q.16.

In the problem figure, the right hand element of the figure is related to the left hand element of the figure in a certain way. Both the elements are rectangles, but the right hand element is horizontal while the left hand element is vertical.
In the answer figure 2, both the elements of the figure are straight lines. The right hand element is horizontal while the left hand element is vertical. Therefore, (2) is the correct answer.
Now attempt the following question :
Q.17.
àZ Aht Problem Figures

## 2. Classification :

Study the following questions based on classification.

In classification, the Problem Figures themselves are also the Answer Figures. Out of the five figures, four are similar in a certain way. One figure is not like the other four. That means four figures form a group. The question is which one of the figures does not belong to this group?
For example, look at the Q. No. 18. Of the five figures, four are straight lines whereas one is a circle. The four lines form a group. The circle does not belong to this group. Therefore, the answer is the circle which is figure 1.
Q.19.

Study the five figures. The first four figures form a group as they represent living beings while the fifth figure, the triangle, does not represent a living being. Therefore the answer is 5 .
Now attempt the following question.
Q.20.

## 3. Series (I)

Study the following problems based on series.
Q.21.

Note that the five figures given first at the left are called Problem Figures. The five figures given next are called Answer Figures. They are indicated by numbers 1, 2, 3, 4 and 5.

The five Problem Figures make a series. That means they change from left to right in a specific order. The question is 'If the figures continue to change in the same order, what should the sixth figure be ? In the example above, as you go from left to right, you find that the line across the Problem Figures is inclining towards left.

The question is, 'if the line continues to incline further, what will be its next, i.e. sixth position ?' The answer would be it would fall further and be lying flat, ie. it will be horizontal.
Q.22.

Study the position of the dot in all the Problem Figures. Note that it keeps moving around the square in the clockwise directions. Where would it be next in the sixth position ? It would come back to the upper left corner. Therefore, the answer is 2.
Now solve the following questions.
Q.23.

ComAh Answer Figures

Q.24.

## 3. Series (II)

In each of the following problems, a series is established if the positions of the two out of five numbered figures are interchanged. The position of the first unnumbered figure remains the same. It is the beginnng of the series. The earlier of the two numbered figures whose positions are interchanged is the Answer. If it is not necessary to interchange the positions of figures to establish the series, write 5 as your answer. Remember that when the series is established, the figures change from left to right (i.e. from the unnumbered figure to the last figure), in a specific order.
Now study the following problems :
Q.25.

> áíZ Ahlish Problem Figures

In this problem, a series is already established. It is not necessary to interchange the positions of any two numbered figures. Therefore, mark (5) as the correct Answer.
Q.26.

In this problem a series is established by interchanging the positions of figures (4) and (5). Therefore, Mark (4) as the correct Answer.

## Data Analysis and Interpretation

This test is designed to measure how fast and accurate you are in dealing with numbers, viz. computation, quantitative reasoning, interpretation of tables and graphs etc.

Q.35. Which attribute is considered the least important for promotion?
(1) Honesty
(2) Intelligence
(3) Perseverance

## HOW TO SHOW YOUR ANSWERS TO OBJECTIVE TYPE QUESTIONS :

Each question is followed by answers which are numbered 1,2,3, 4 and 5 . Select the most appropriate answer. Then by using HB Pencil, blacken the oval bearing the correct answer against the serial number of the question. Please note that the oval should be dark enough and should be filled in completely. For example, if the answer to Question Number 2 is answer number 5 , it is to be shown as follows.
Q.2.

HOW TO CHANGE YOUR ANSWER :
If you wish to change your answer, ERASE COMPLETELY the already darkened oval by using good quality eraser and then blacken the new oval bearing your revised answer number.

While changing the answer, erasing the earlier answer completely is extremely essential. If it is not erased completely, smudges will be left on the erased oval as shown below and the question will be read as having two answers. Therefore, no marks will be given.

## Q.3.

(Smudge left in oval No. 3 due to bad erasure and the fresh answer in oval No. 4 will be read as two answers 3 \& 4, and therefore no credit will be given even if the answer No. 4 happens to be the correct answer).

## VERY IMPORTANT :

Please note that you SHOULD NOT USE an H, 2H / HH, 3H type Pencil. The marks made by such hard pencil will be too light and will not be read by the computerised machine. Similarly you should NOT use too soft pencils like $B / B B / 2 B$ etc.

## How to fill up information on the answersheet

## Important

1. The information is to be filled in by you in boxes 1-11 and 13-28 on side 1 and in box 29 on side 2 of the answersheet.
