COMPREHENSION

Directions (For the 10 items which follow) :

In this section, you have **two** short passages. After each passage, you will find several questions based on the passage. First, read a passage and then answer the questions based on it. You are required to select your answers based on the contents of the passage and opinion of the author only.

Examples 'I' and 'J' have been solved for you.

PASSAGE (EXAMPLE)

In our approach to life, be it pragmatic or otherwise, a basic fact that confronts us squarely and unmistakably is the desire for peace, security and happiness. Different forms of life at different levels of existence make up the teeming denizens of this earth of ours. And, no matter whether they belong to the higher groups such as human beings or to the lower groups such as animals, all beings primarily seek peace, comfort and security. Life is as dear to a mute creature as it is to a man. Even the lowliest insect strives for protection against dangers that threaten its life. Just as each one of us wants to live and not to die, so do all other creatures.

I. The author's main point is that

- (a) different forms of life are found on the earth
- (b) different levels of existence are possible in nature
- (c) peace and security are the chief goals of all living beings
- (d) even the weakest creature struggles to preserve its life

J. Which one of the following assumptions or steps is essential in developing the author's position?

- (a) All forms of life have a single overriding goal
- (b) The will to survive of a creature is identified with a desire for peace
- (c) All beings are divided into higher and lower groups
- (d) A parallel is drawn between happiness and life, and pain and death

Explanation :

- I. The idea which represents the author's main point is "peace and security are the chief goals of all living beings", which is response (c). So (c) is the correct answer.
- J. The best assumption underlying the passage is "The will to survive of a creature is identified with a desire for peace", which is response (b). So (b) is the correct answer.

PASSAGE—I

When we talk of education in our present age, we think largely in terms of schools and colleges. The man who is well-to-do spends money in sending his son to foreign lands, in the belief that some wonderful process will take place there transforming a dull fellow into a genius. Yet the products of expensive schools and universities often fail to make good. On the other hand, the poor man who has struggled against adversity often earns the highest honour. The fact is that the true background of early education is the home. The home, the influence of the mother, the inspiring examples that are held before the child at an age while he is impressionable, are the true groundwork of character.

41. According to the passage, who helps in our character-building?
 - (a) A foreign university
 - (b) A well-to-do man
 - (c) Examples that inspire
 - (d) A man who has earned honour
42. The proper background of early education is
 - (a) a school
 - (b) a college
 - (c) a religious institution
 - (d) the home
43. From the passage, we get an impression that the highest honour is earned by
 - (a) a man who has received education in a foreign country
 - (b) a man who has struggled against adversity
 - (c) a man who has seen prosperity alone
 - (d) the son of a prosperous man
44. A well-to-do man sends his son to foreign lands
 - (a) because it is the fashion of the day
 - (b) in the belief that his dull son will be transformed into a genius
 - (c) so that the son may learn the customs of those countries
 - (d) in order to make his son familiar with the persons and places of those countries
45. The expression "the products of expensive schools and universities often fail to make good" means
 - (a) they fail to make a mark in life
 - (b) they fail to become intelligent
 - (c) they fail to earn proper living
 - (d) they do not earn good reputation

PASSAGE—II

The functional declines of advancing age are depressing. The heart's ability to pump blood drops about one percent : blood flow to arms and legs decreases by thirty to forty percent in old age. The amount of air a person can exhale after a deep breath lessens and the chest wall stiffens with age. However, recent studies have shown that most of these age-associated declines can be delayed by exercise. Exercise lowers the resting heart-rate and increases the amount of blood pumped with each beat in older people. When stress is placed on bones through exercise, calcium content rises, with the result that resistance to fracture is improved.

46. Old age is generally a depressing period, because

- (a) old people worry more than others
- (b) old people tend to regret their past
- (c) various organs of the body function less efficiently
- (d) old people do very little work

47. The strength of bones can be increased by exercise, because it

- (a) increases the amount of blood pumped by the heart
- (b) increases calcium content in bones
- (c) increases the amount of air exhaled by a person
- (d) lessens the stiffness of the chest wall

48. The word 'exhale' means

- (a) breathe in
- (b) breathe out
- (c) breathe slowly
- (d) breathe fast

49. Which one of the following statements is correct?

- (a) Exercise delays natural decay of old age
- (b) Old-age problems increase due to exercise
- (c) Exercise increases the heart-beat which is dangerous
- (d) Exercise creates stress which is harmful to bones

50. The chest wall becomes stiff in old age, because

- (a) the heart's ability to pump blood to it drops about one percent
- (b) the blood flow to various organs decreases
- (c) the resting heart-rate becomes high
- (d) the person's ability to exhale sufficient air lessens
