

MAT.pdf

This SiteManager database listing includes Code: MAT with Description: Materials Division for the Field Acceptance Method.

This typically occurs in two cases:

A. The database listing has been manually expired or terminated - meaning this particular listing may not be field accepted using the “Standard” Field Acceptance Method until such time that the required re-approval occurs.

Or

B. The “Standard” Field Acceptance Method for the product has not yet been defined in the same manner as other products and does not appear on the website.

Determine A. or B. by looking at the Field Acceptance Methods for other Product Names on the same list. If MAT is listed for all of them, the case is B. If a number of other Product Names have a common 5000 series Field Acceptance Code, the case is most likely A.

If necessary, please contact the [Materials Division](#) for information regarding field acceptance procedures for these listings.

Thank-You
