

## Texas Instruments Sample 2005

1. given an expression tree and asked us to write the infix of that expression  
four choices : 2
2. global variables in different files are  
a) at compiletime  
b) loading time  
c) linking time  
d) execution time
3. size of(int)  
a) always 2 bytes  
b) depends on compiler that is being used  
c) always 32 bits  
d) can't tell
4. which one will overflow given two programs  
prog 1: prog2:  
main() main()  
{ {  
int fact; int fact=0  
long int x; for(i=1;i<=n;i++)  
fact=factorial(x); fact=fact\*i;  
} }  
int factorial(long int x)  
{  
if(x>1) return(x\*factorial(x-1));  
}  
a) program 1;  
b) program 2;  
c) both 1 & 2  
d) none  
}
5. variables of function call are allocated in  
a) registers and stack  
b) registers and heap  
c) stack and heap  
d)
6. avg and worst case time of sorted binary tree
7. data structure used for priority queue  
a) linked list b) double linked list c) array d) tree

8. `main(){  
char str[5]="hello";  
if(str==NULL) printf("string null");  
else printf("string not null");  
}  
what is out put of the program?  
a) string is null b) string is not null c) error in program d) it executes but print nothing`
9. There are One 5 pipe line and another 12 pipe line sates are there and flushed time taken to execute five instructions a) 10,17  
b) 9,16  
c)25,144  
d)
10. for hashing which is best on terms of buckets  
a)100 b)50 c)21 d)32 ans 32
11. `void f(int value){  
for (i=0;i<16;i++){  
if(value &0x8000>>1) printf("1")  
else printf("0");  
}  
}  
what is printed?  
a) bineray value of argument b)bcd value c) hex value d) octal value`
12. `void f(int *p){  
static val=100;  
val=&p;  
}  
main(){  
int a=10;  
printf("%d ",a);  
f(&a);  
printf("%d ",a);  
}  
what will be out put?  
a)10,10`
13. `struct a{  
int x;  
float y;  
char c[10];  
}  
union b{  
int x;  
float y;  
char c[10];  
}`

which is true?

- a) `sizeof(a) != sizeof(b);`
- b)
- c)
- d)

14. #define f(a,b) a+b  
#define g(c,d) c\*d  
find value of f(4,g(5,6))  
a) 26 b) 51 c) d)

15. find avg access time of cache  
a)  $tc * h + (1-h) * tm$  b)  $tcH + tmH$   
c) d)  $tc$  is time to access cache  $tm$  is time to access when miss occurs

16. main()  
{  
char a[10] = "hello";  
strcpy(a, '\0');  
printf("%s", a);  
}  
out put of the program?  
a) string is null b) string is not null c) program error d)

17. simplify k map  
1 x x 0  
1 x 0 1

18. int f(int a)  
{  
a = +b;  
//some stuff  
}  
main()  
{  
x = fn(a);  
y = &fn;  
what are x & y types  
a) x is int y is pointer to a function which takes integer value

19. char a[5][15];  
int b[5][15];  
address of a is 0x1000 and b is 0x2000 find address of a[3][4] and b[3][4]  
assume char is 8 bits and int is 32 bits  
a) b) c) d)

there are 20 questions all in technical paper and 36 questions in aptitude test in aptitude they have given all diagrams and asked to find what comes next they are quite easy and I hope if you practice r.s. aggraval you can do it easily for technical they have given 1 hr for 20 questions and for non-technical they have given only 40 min and 36 questions

this is the paper i have right now for TI aptitude test consist of all pictorial questions. ie in each question he will give 8 diagrams and ask to find th 9'th diagram in that sequence. You go through RS Agarwal. These aptitude questins are very easy. Just pratice them. In RS Agarwal gothrough SERIES chapter. It is sufficient. There are 35 aptitude questions. First 25 are very easy. Do these questions in just 15 or 20 minutes. Because last questions are very touch.

#### TECHNICAL TEST:

1. 3 flipflops are connected so that after 0 to 5 count occured next number is zero. So what is the counter?  
Ans: mod 6 counter
2. simplication of some boolean expression which is simple. Boolean Expression is  $A+A'B$ .  
Ans:  $A+B$
3. Given inorder sequence and preorder sequence and asked to find out postorder sequence.
4. Some question on value of a static variable.
5. Given an interger in binary form, find the number of ones in that number without counting each bit. (This questin is not multiple choice question. This question carries more marks. So please take care for this question.)
6. 1-way set associative memory is called-----  
a)direct b)something c)1-way set associative 4)something  
Ans: c
7. Fastest IPC mechanism is  
a)shared memory b)pipes c)named pipes d)semaphores  
Ans:c
8. Some page references are given. You are asked to implement it with Least Frequently Used algorithm.
9. Some diagram is given. Iam describinmg the diagram. A 2\*1 MUX is given. The inputs are A,B. Output is C. C and A are tied together. What is the diagram?  
Ans:Latch.

This paper is for Electrical & Electronics students. There is separate test for computer Science Students. There are 20 questions.

1. 1)Some circuit is given. Iam describing the circuit. A resistor R & a capacitor C are connected in parallel.  
To this circuit another circuit which is having a capacitor of capacity  $2C$  & an impedance Z, is connected in series.

You are asked to find out the value of Z? Note that 2C & Z are connected in series.

- a)  $Z=2C$
- b)  $Z=2L$
- c)  $Z=L/2$
- d)  $Z=2R$

2. Some circuit which consist of only resistors R is given. This is a repetitive circuit. U have to find the effective resistance of the entire circuit.

- A)  $R_{in}=R$
- B)  $R_{in}=(5+\sqrt{3})/7$
- C)  $R_{in}=(19+\sqrt{3})/8$
- D) None.

3. Two wave forms are given. You are asked to write the circuit to get B(second wave form) from A(first wave form).

4. #define SUM(a,b) a+b

```
main()
{
a=2;
b=3;
x=SUM(a,b)*2;
printf("x=%d\n",x);
}
```

Ans:8.

5. number(int i)

```
{
number++;
printf("%d\n",number);
}
main()
{
static int i=0;
number(i);
}
```

Ans: I don't know.

6. Some circuit is given. I can't describe the circuit. There are 3 resistors, 3 capacitors & one inverter.. The question is What is the value of the frequency such that the circuit oscillates.

- A)  $f=RC$
- B)  $f=\sqrt{3}/(\pi * R * C)$
- C)  $f=1/(\pi * R * C)$
- D) something

Ans: I don't know the answer.

7. 7) Question on flipflop. So go through all flipflops.

8. 8) There are 5 questions on Nmos & Pmos circuits.

This Paper is for Computer Science Students. This paper is very easy. You can definitely do it in one hour.

1. The fastest memory is

(i) DRAM, (ii) ROM, (iii) SRAM, (iv) Main memory

Ans : SRAM

2. Programming exceptions are

(i) Asynchronous, (ii) Synchronous, (iii) None

Ans : Asynchronous

3. DSP which architecture is used

(i) MIMD, (ii) SIMD, (iii) Nueman, (iv) Harvard Architecture

Ans : Harvard Architecture

4. C prog. for searching for an element in linked list

5. main()

```
{
unsigned char i;
int sum;
for(i=0; i<300; i++)
sum+= i;
printf("\nSum = %d\n", sum);
}
```

Ans : infinite loop

6. void fn(int \*p)

```
{
static int val = 100;
p = &val;
}
main()
{
int i=10;
printf("i=%d\n", i);
fn(&i);
printf("i=%d\n", i);
}
```

Ans : i=10 i=10

7. int a[10][15];

char b[10][15];

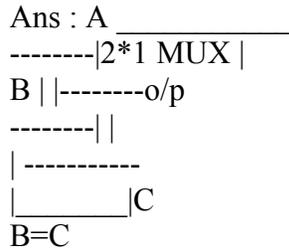

(a) location of a[3][4], if base location of a[0][0] is 0x1000

(b) location of b[3][4], if base location of b[0][0] is 0x2000

int takes 32 bits and char takes 8 bits.

Ans : (a) 0x10C4 (b) 0x2031

8. Implement OR gate function with 2\*1 MUX

9. Implement 4\*1 MUX with 2\*1 MUXES

10. Swapping without using a temporary variables. (2 methods)

(i)  $x = x+y;$   
 $y = x-y;$   
 $x = x-y;$   
(ii)  $x = x^y;$   
 $y = x^y;$   
 $x = x^y;$

11. Count no of 1's in a word without using bit by bit. (This question carries more marks. It is not a multiple choice question.)

12. Code 1 :

```
for(i=0; i<1000; i++)
for(j=0; j<100; j++)
x = y;
```

Code 2 :

```
for(i=0; i<100; i++)
for(j=0; j<1000; j++)
x = y;
```

Which code will execute faster

- (i) Code 1 and Code 2 are of same speed,
- (ii) Code 1,
- (iii) Code 2,
- (iv) None.

Ans : Code 2

13. main()

```
{
int a[10] = {1, 2, 3, ..., 10}, i, x=10, temp;
for(i=0; i
temp = a[i];
a[i] = a[x-i-1];
a[x-i-1] = temp;
}
```

- (i) All contents of array a are reversed

- (ii) Only some portions are altered
  - (iii) Remains same
  - (iv) None
- Ans : (iii)

14. An array is stored in row major order. The memory capacity is 30 MB. And in unix system demand paging is used. Which one will give more page faults?

```
#define V_L_I 10000
int i, j, array[V_L_I][V_L_I];
```

Code 1 :  
array[i][j] = 1;

Code 2 :  
for(j=0; j<V\_L\_I; j++)  
for(i=0; i<V\_L\_I; i++)  
array[i][j] = 1;

Ans : Code 2

15. In C which parameter passing technique is used?

- (i) call by value,
- (ii) call by reference,
- (iii) both

Ans : call by value

16. A circuit is given with 2 exclusive OR gates whose boolean expression will be  $y = \overline{(AB)} + AB$  (' indicates bar)

17. (17) main()

```
{
int i = 1;
fork();
fork();
printf("\ni = %d\n", i+1);
}
```

Ans : 4 printf's will occur and i = 2

18. Compute the complexity of Binary search.

Ans :  $O(\lg n)$  ( Answer in detail. This is not a multiple choice question. It carries more marks.)

19. Write expression for the tree graph :

Ans :  $((a-b) + c*d)/x$

20. # define MAX(a, b) a>b ? a:b

```
main()
{
int m, n;
m = 3 + MAX(2, 3);
n = 2 * MAX(3, 2);
printf("m = %d, n = %d\n", m, n)
```

}

Ans :  $m=2, n=3$
