

## **SAP uAcademy Course Details**

### **Why SAP Education**

SAP systems are online interactive systems that provide a complete solution to the information needs to an organization.

A sound knowledge of SAP applications will prepare business and technical students for the corporate world. Business and IT Graduates with SAP ERP Application knowledge can quickly get into the groove of an organization running such applications or can introduce these applications as tools for better business practices and processes. Job-seekers and future BE, MBA's (MCA's) and B.Com/BBM's (BCA's) would be well advised to gain an intimate know-how of the applications used in the real-world.

Participants would understand an ERP from all perspectives. Many Business school graduates who plan to be entrepreneurs can implement any ERP after an understanding of such a product.

### **Benefits of SAP Education**

The benefits of SAP education are as follows:

1. Increase the net market value of the resource – SAP is becoming almost a necessity for the enterprises to manage their business processes, so in this regard a professional having this knowledge adds value to the organization immediately.
2. Increase in job placement – On the direct advantage SAP learning would increase the operating knowledge of the core domain business process and quickly can be ramped on the actual job function. This directly cuts the training cost on SAP for the prospective employers.
3. Increase in ability to manage the business– SAP training would quickly enable the resources to effectively use the business information for their decision making and focus on the objectives of their core competencies.
4. Manage the IT systems in tune to the business demands –The resources would have the necessary knowledge to manage the application in tune to their business demands, rather than depending on the external consultants for designing and configuring the business application.

## **Course Details and Pricing**

### **1. SAP01 COURSE CONTENT**

SAP01 is a course that introduces you to the various SAP solutions, applications, components, and terminology. It is a must-do foundation course that provides the participant with the basic SAP knowledge which can be useful to learn high-end SAP courses.

The participant could be a beginner in SAP or a member of a team involved in organizing and planning an SAP implementation. The participant needs to have a working knowledge of PCs, Microsoft Office, and internet browsers. No specific technical knowledge is required. However, a familiarity or working experience with basic business processes will be helpful. As this is an overview course, the details of the SAP applications and components are left to subsequent courses.

The course begins with giving a background of SAP, the company, in terms of founding history, market growth, and product portfolio. The participant is then familiarized with basics such as logging on to an SAP system and navigating within it, common terminology, and concepts. Once this is complete, the course moves on to introduce and familiarize the participant with the different SAP solutions and components.

Every section of the course is complemented by simulations that depict to the participant scenarios and case studies of different business situations handled in the SAP system.

S.No.	Module	Course Content
1.	Functional	<b>SAP 01</b> <ul style="list-style-type: none"> <li>➤ mySAP Business Suite</li> <li>➤ SAP NetWeaver incl.
