Certain words are given in bold to help you to locate them while answering some of the questions.

Passage - I

Americans have a variety of superstitions like walking under a ladder, a black cat crossing your path and the number 13, none of which seem to have a logical reason for being. However, there are no serious taboos attached to them. Individuals may have an array of sensitivities based on their personal beliefs. If you do offend someone inadvertently, a sincere apology will usually go a long way toward making amends. The one sensitivity that almost all Americans have is about slights to their country. Either complaining about the US or expressing an attitude that your culture is superior can cause Americans to take offence. Americans do possess a great deal of culture arrogance, and think that their way is the only right way. They think that the US is the best place on earth, otherwise why would everybody be trying to get here? Whether you agree or not, remember that you are a guest in the US and it would be rude for a guest to insult his host

### **Passage - II**

Population is one resource that never depletes and is a living development parameter. But it is at times interpreted as a hindering factor for development. This happens because population is both a consumer and producer. There are two schools of thought. One which treats population as a resource, and the other as a burden to the society. The truth, in fact, lies somewhere in between. The interplay of factors responsible for population growth and those for development decide the resourcefulness of population.

**20. Why is it said that population is one resource that never depletes?**

- 1) because other resources deplete
- 2) because population is an ever-increasing phenomenon
- 3) because population is seen as a resource
- 4) because it is an easily available commodity
- 5) None of these

**21. Why population is at the same time treated as a resource and also as a burden to the society?**

- 1) because population is the creator and at the same time it is also the user
- 2) because a less number of people are engaged in production and a large number of people are dependent on it
- 3) because population is not always a producer but it is always a consumer
- 4) when the growth of population is checked it is a resource and when it increases rapidly it is burden to the society
- 5) None of these

**22. The resourcefulness of population can be decided by**
