Directions for Questions 11-14: Read the passage and answer the questions that follow on the basis of the information provided in the passage.

Disequilibrium at the interface of water and air is a factor on which the transfer of heat and water vapor from the ocean to the air depends. The air within about a millimeter of the water is almost saturated with water vapor and the temperature of the air is close to that of the surface water. Irrespective of how small these differences might be, they are crucial, and the disequilibrium is maintained by air near the surface mixing with air higher up, which is typically appreciably cooler and lower in water vapor content. The turbulence, which takes its energy from the wind mixes the air. As the speed of wind increases, so does the turbulence, and consequently the rate of [heat](#) and moisture transfer. We can arrive at a detailed understanding of this phenomenon after further study. The transfer of momentum from wind to water, which occurs when waves are formed is an interacting-and complicated phenomenon. When waves are made by the wind, it transfers important amounts of [energy](#)-energy, which is consequently not available for the production of turbulence.

11. **This passage principally intends to:**

- A. resolve a controversy
- B. attempt a description of a phenomenon

- C. sketch a theory
- D. reinforce certain research findings
- E. tabulate various observations

Answer : B

12. **The wind over the ocean usually does which of the following according to the given passage?**

- I. Leads to cool, dry air coming in proximity with the ocean surface.
- II. Maintains a steady rate of heat and [moisture](#) transfer between the ocean and the air.
- III. Results in frequent changes in the ocean surface temperature.

- A. I only
- B. II only
- C. I and II only
- D. II and III only
- E. I, II, and III

Answer : A

13. **According to the author the present knowledge regarding heat and moisture transfer from the ocean to air as**

- A. revolutionary
- B. inconsequential
- C. outdated
- D. derivative
- E. incomplete

Answer : E

14. **According to the given passage, in case the wind was to decrease until there was no wind at all, which of the following would occur?**

- A. The air, which is closest to the ocean surface would get saturated with water vapor.
- B. The water would be cooler than the air closest to the ocean surface.
- C. There would be a decrease in the amount of moisture in the air closest to the ocean surface.
- D. There would be an increase in the rate of heat and moisture transfer.
- E. The temperature of the air closest to the ocean and that of the air higher up would be the same.

Answer : A

Directions for Questions 15-20: Read the passage and answer the questions that follow on the basis of the information provided in the passage.

Roger Rosenblatt's book *Black Fiction*, manages to alter the approach taken in many previous studies by making an attempt to apply literary rather than sociopolitical criteria to its subject. Rosenblatt points out that criticism of Black writing has very often served as a pretext for an expounding on Black history. The recent work of Addison Gayle's passes a judgement on the value of Black fiction by clearly political standards, rating each work according to the ideas of Black identity, which it propounds.

Though fiction results from political circumstances, its author react not in ideological ways to those circumstances, and talking about novels and stories primarily as instruments of ideology circumvents much of the fictional enterprise. Affinities and connections are revealed in the works of Black [fiction](#) in

Rosenblatt's literary analysis; these affinities and connections have been overlooked and ignored by solely political studies.

The writing of acceptable criticism of Black fiction, however, presumes giving satisfactory answers to a quite a few questions. The most important of all, is there a sufficient reason, apart from the racial identity of the authors, for the grouping together of Black authors? Secondly, what is the distinction of Black fiction from other modern fiction with which it is largely contemporaneous? In the work Rosenblatt demonstrates that Black fiction is a distinct body of writing, which has an identifiable, coherent literary tradition. He highlights recurring concerns and designs, which are independent of chronology in Black fiction written over the past eighty years. These concerns and designs are thematic, and they come form the central fact of the predominant white culture, where the Black characters in the [novel](#) are situated irrespective of whether they attempt to conform to that culture or they rebel against it.

Rosenblatt's work does leave certain aesthetic questions open. His thematic analysis allows considerable objectivity; he even clearly states that he does not intend to judge the merit of the various works yet his reluctance seems misplaced, especially since an attempt to appraise might have led to interesting results. For example, certain novels have an appearance of structural diffusion. Is this a defeat, or are the authors working out of, or attempting to forge, a different kind of aesthetic? Apart from this, the style of certain Black novels, like Jean Toomer's *Cane*, verges on expressionism or surrealism; does this technique provide a counterpoint to the prevalent theme that portrays the fate against which Black heroes are pitted, a theme usually conveyed by more naturalistic modes of expressions?

Irrespective of such omissions, what Rosenblatt talks about in his work makes for an astute and worthwhile study. His book very effectively surveys a variety of novels, highlighting certain fascinating and little-known works like James Weldon Johnson's *Autobiography of an Ex-Coloured Man*. Black Fiction is tightly constructed, and levelheaded and penetrating criticism is exemplified in its forthright and lucid style.

15. The author of the passage raises and objection to criticism of Black fiction like that by Addison Gayle as it:

- A. Highlights only the purely literary aspects of such works
- B. Misconceive the ideological content of such fiction
- C. Miscalculate the notions of Black identity presented in such fiction
- D. Replaces political for literary criteria in evaluating such fiction
- E. Disregards the reciprocation between Black history and Black identity exhibited in such fiction.

Answer : D

16. The primary concern of the author in the above passage is:

- A. Reviewing the validity of a work of criticism
- B. Comparing various critical approaches to a subject
- C. Talking of the limitations of a particular kind of criticism
- D. Recapitulation of the major points in a work of criticism
- E. Illustrating the theoretical background of a certain kind of criticism.

Answer : A

17. The author is of the opinion that Black Fiction would have been improved had Rosenblatt:

- A. Undertaken a more careful evaluation of the ideological and historical aspects of Black Fiction
- B. Been more objective in his approach to novels and stories by Black authors
