- (i) In this section, a number of sentences are given. The sentences are underlined in three separate parts and each one is labelled (a), (b) and (c). *Directions* (For the **ten** items which follow) :

In this section, you have three short passages. After each passage, you will find several questions based on the passage. First, read a passage and then answer the questions based on it. You are required to select your answers based on the contents of the passage and opinion of the author only.

Examples 'I' and 'J' have been solved for you.

#### PASSAGE (EXAMPLE)

In our approach to life, be it pragmatic or otherwise, a basic fact that confronts us squarely and unmistakably is the desire for peace, security and happiness. Different forms of life at different levels of existence make up the teeming denizens of this earth of ours. And, no matter whether they belong to the higher groups such as human beings or to the lower groups such as animals, all beings primarily seek peace, comfort and security. Life is as dear to a mute creature as it is to a man. Even the lowliest insect strives for protection against dangers that threaten its life. Just as each one of us wants to live and not to die, so do all other creatures.

I. The author's main point is that

- (a) different forms of life are found on the earth
- (b) different levels of existence are possible in nature
- (c) peace and security are the chief goals of all living beings
- (d) even the weakest creature struggles to preserve its life

J. Which one of the following assumptions or steps is essential in developing the author's position?

- (a) All forms of life have a single overriding goal
- (b) The will to survive of a creature is identified with a desire for peace
- (c) All beings are divided into higher and lower groups
- (d) A parallel is drawn between happiness and life, and pain and death

*Explanation :*

I. The idea which represents the author's main point is "peace and security are the chief goals of all living beings", which is response (c). So (c) is the correct answer.

J. The best assumption underlying the passage is "The will to survive of a creature is identified with a desire for peace", which is response (b). So (b) is the correct answer.

## PASSAGE—I

The life cycle of a butterfly is very dramatic and action-packed, because so much happens in so short a time. The most interesting is the caterpillar stage. They are very vulnerable to attacks and use camouflage to protect themselves. Generally their colours help them blend with the surroundings. Also, their bodies have thin lines much like the veins of a leaf. Some caterpillars use the leaf to make themselves invisible. Some of them are even beautiful, especially the ones that are grass-yellow. This shade of green is fabulous but strangely the adult is not so beautiful.

Butterflies have many enemies but most stay away from them because they are very bitter to the taste ! This saves them from many aggressors. The swallowtail caterpillar emits a strong odour to keep its enemies at bay. Some caterpillars simply drop to the ground and climb back up the tree only after the enemy has gone.

- (a) several actions take place at the same time

The man had a newspaper open in front of him, which he was pretending to read, though all the while I could see that he was keeping an eye on me. When the waiter brought my soup, the man was clearly puzzled by the familiar way in which the waiter and I addressed each other.
