SNAP ID							

Please read the following instructions carefully.
Do not open the seal until the Invigilator instructs you to open.

1. Answer OMR Sheet is contained inside the Test Booklet. Make sure that the Answer OMR Sheet is not damaged in any way.
2. Use only a blue/black ball point pen to darken circles on Answer OMR Sheet.
3. Write your SNAP-Id and darken appropriate circles in the Answer OMR Sheet.
4. The sequence of the sections differs in each Booklet series. However as mentioned in SNAP 2009 Bulletin, the Sections remain the same.

Sections	Total Marks	No. of Questions
General English	40	40
Quantitative & Data Interpretation & Data Sufficiency	40	40
General Awareness: General Knowledge, Current Affairs, Business Scenario	40	40
Analytical & Logical Reasoning	60	30
Total	**180**	**150**

5. In the Answer OMR Sheet, darken the circles against the question numbers indicating your answers. For example, if your answer is 2 for a question, then darken as follows:

    1   2   3   4
    ○   ●   ○   ○

    Darken only one circle. If you darken more than one circle against any question, you will score zero mark.
    Use only a blue/black ball point pen for filling the OMR sheet. Do not use pencil.

6. **For every wrong answer, you will score 25% negative marks.**
7. Do not attempt to copy nor allow or help others in copying. Any malpractice will invalidate your candidature.
8. Return this Test Booklet and Answer OMR Sheet to the Invigilator before you leave the hall. Answer Sheet is valid only if it is returned with the Test Booklet.
9. Do not leave the hall at any point of time without handing over your Test Booklet and Answer Sheet to the Invigilator.
10. You may take the question paper back with you.
11. Once you go out of the hall, re-entry is not permitted.

Best of Luck!

43. According to the National Agricultural Aviation Society (NAAS), without the use of crop protection products to control insects, weeds, and diseases, crop yields per acre will drop by more than 50 percent. The first aerial application of insecticide occurred in 1921, and it was a huge success. By contrast, in today's economy all aircraft that are classified as aerial applicators do more than just apply insecticide; today, they also spread sees and apply fertilizer.

From the information given above it CANNOT be validly concluded that

(1) according to the NAAS, if crop yields per acre never drop by more than 50 parcent, then crop protection products have been used to control insects, weeds, and diseases.
(2) in today's economy any aircraft that cannot be used to apply fertilizer cannot be classified as an aerial applicator
(3) in today's economy, if an aerial applicator is used, then it will be able to spread seed and to apply fertilizer
(4) according to NAAS, if crop yields per acre drop by more than 50 percent, then crop protection products have not been used to control insects, weeds, and diseases.

44. Lou observes that if flight 409 is cancelled, then the manager could not possibly arrive in time for the meeting. But the flight was not cancelled. Therefore, Lou concludes, the manager will certainly be on time. Evelyn replies that even if Lou's premises true, his argument is fallacious. And therefore, she adds, the manages will not arrive on time after all.

_____

Which of the following is the strongest thing that we can properly say about this discussion?

(1) Evelyn is mistaken in thinking Lou's argument to be fallacious, and so her own conclusion is unwarranted.
(2) Evelyn is right about Lou's argument, but nevertheless her own conclusion is unwarranted.
(3) Since Evelyn is right about Lou's argument, her own conclusion is well supported.
(4) Since Evelyn is mistaken about Lou's argument, her own conclusion must be false.

45. Cars are safer than planes. Fifty percent of plane accidents result in death, while only one percent of car accidents result in death.

Read the passage carefully and answer within the context.

"A way to deal with frozen feelings"

Every child experiences all that happens around him with total awareness. In the first seven years the child's brain is like a sponge, taking in all sensory inputs and building his idea of his surroundings. As long as the environment is safe, the child learns with incredible speed. However, when the environment is scary or stressful, the child unlearns past learning just as rapidly.

In the early years of every child's life, whenever there is shock, violence, fear or pain, these intense emotions are imprinted deeply into memory. Whenever the same activity or situation is repeated, the nervous system and body subconsciously re-experience the memory of that trauma.

Any emotional situation that takes us out of the present and into the past means that whenever the same kind of emotion crops up later in our life we return to the past for our reference point. If that point was at age three, we find ourselves behaving like a three-year-old. We feel childish and we behave childishly. Our feelings are the cause of this 'glitch' in our learning process. We know we should be able to make a positive change, but that doesn't change anything.

The process of change need not be traumatic. We couldn't have done any better because we didn't know how to. But we should realise that was then and this is now! We can choose to choose again. It's up to us. It's our movie!

108. The "Frozen Feelings" being talked about are about
