

Axes - Placement sample question papers

Micro Processor

1. Bus arbitration is used for controlling the bus
2. which one is the higher priority a) hold b) interrupt ans: a)
3. 2's complement of 43 010101
4. what happens when PUSH A instruction is executed...
5. INT6 pushes how many bytes on to the stack.
4 BYTE CHECK IT OUT
6. AL = 35, BL = 39
ADD BL
ROL AL, 08
now what are contents of AL.
7. one 8086 program to find the o/p (i.e. to find the largest of all)
8. $x = 11010010$, $y = 00110101$
 $x+y$ what is the result
9. what is the diff b/w RET and IRET
10. What happens when AND/TEST instruction is executed.. flags.
11. What is max unsigned value in 16bit databus
12. what is max address in 16bit address bus
13. what is meant by memory mapped i/o
14. AL = 35
SHL AL, 04
what are contents of AL
15. LIFO occurs in which memory

Communication

1. what is amplitude modulation
2. Bandwidth of telephone line (4k)
3. IP layer uses a) packet switching b) circuit switching
c) store and forward switching d) both a and b
4. which one is not transmission media a) optical fiber b) coaxial cable
c) category 5 UTP d) none of above
5. number of address bits in IPV6 128
6. ISDN is used for digital communication

7. which layer not present in TCP
8. what is the time period of E1 carrier superframe
ans: 2ms
9. what is the bit rate of the E1 carrier/channel
10. ATM is a) adapter b) n/w architecture layer c)
conectar ans: b
11. on ADSL - Asynchronous Digital Subscriber Line
12. on AI Networks?

C- Questions

1. struct {
int a;
char b;
char *c;
}mystruct;
what is the sizeof structer.
 2. union {
int a;
char b : 3;
char c : 2;
}x;
what is the sizeof union.
 3. what is sizeof('a')
 4. write p is pointer to constant char
a) char const *p;
b) char *const p;
c) const *char p;
d) const char *p;
 5. which one is faster compiler or interpreter
 6. sizeof is _____
 7. STACK is part of _____ ? ANS:-RAM
 8. TO print % ?
 9. #include includes definitions or
declarations?
Ans:-declarations.
 10. where the locals and globals are stored. Ans :-
stack & heap.
 - 11.
-
1. A 2MB PCM(pulse code modulation) has
a) 32 channels
b) 30 voice channels & 1 signalling channel.
c) 31 voice channels & 1 signalling channel.
d) 32 channels out of which 30 voice channels, 1
signalling channel, &
1 Synchronizatio channel.
Ans: (c)

2. Time taken for 1 satellite hop in voice communication is

- a) 1/2 second b) 1 seconds c) 4 seconds d) 2 seconds

Ans: (a)

3. Max number of satellite hops allowed in voice communication is :

- a) only one b) more than one c) two hops d) four hops

Ans: (c)

4. What is the max. decimal number that can be accommodated in a byte.

- a) 128 b) 256 c) 255 d) 512 Ans: (c)

5. Conditional results after execution of an instruction in a micro processor is stored in

- a) register b) accumulator c) flag register d) flag register part of PSW(Program Status Word) Ans: (d)

6. Frequency at which VOICE is sampled is

- a) 4 Khz b) 8 Khz c) 16 Khz d) 64 Khz Ans: (a)

7. Line of Sight is a) Straight Line b) Parabolic c)

Tx & Rx should be visible to each other d) none Ans:

(c)

8. Purpose of PC(Program Counter) in a MicroProcessor is

- a) To store address of TOS(Top Of Stack) b) To store address of next instruction to be executed. c) count the number of instructions.

d) to store base address of the stack. Ans: (b)

9. What action is taken when the processor under execution is

interrupted by a non-maskable interrupt?

- a) Processor serves the interrupt request after completing the

execution of the current instruction. b)

Processor serves the interrupt request after completing the current task. c) Processor serves the interrupt

request immediately. d) Processor serving the

interrupt request depends upon the priority of the

current task under execution. Ans: (a)

10. The status of the Kernel is

- a) task b) process c) not defined. d) none of the

above. Ans: (b)

11 What is the nominal voltage required in subscriber loop connected to local exchange?

a) +48 volts b) -48 volts c) 230 volts d) 110 volts

12. To send a data packet using datagram , connection will be established

a) before data transmission. b) connection is not established before data transmission. c) no connection is required. d) none of the above. Ans: (c)

13. Word alignment is a) aligning the address to the next word boundary of the machine. b) aligning to even boundary. c) aligning to word boundary. d) none of the above. Ans: (a)

14 When a 'C' function call is made, the order in which parameters passed to the function are pushed into the stack is

a) left to right b) right to left c) bigger variables are moved first than the smaller variables. d) smaller variables are moved first than the bigger ones. e) none of the above. Ans: (b)

15 What is the type of signalling used between two exchanges?

a) inband b) common channel signaling c) any of the above d) none of the above. Ans: (a)

16. Buffering is a) the process of temporarily storing the data to allow for small variation in device speeds b) a method to reduce cross talks c) storage of data within transmitting medium until the receiver is ready to receive. d) a method to reduce routing overhead. Ans: (a)

17. A protocol is a set of rules governing a time sequence of events that must take place between a) peers b) non-peers c) allocated on stack d) assigned to registers.

18. Memory allocation of variables declared in a program is

a) allocated in RAM. b) allocated in ROM. c) allocated on stack.

d) assigned to registers. Ans: (c)

19. A software that allows a personal computer to pretend as a computer terminal is a) terminal adapter b) bulletin board c) modem d) terminal emulation Ans: (d)

20. Find the output of the following program

```
int *p, *q;  
p=(int *)1000;  
q=(int *)2000;  
printf("%d", (q-p));  
Ans: 500
```

21. What does the statement `int(*x[])()` indicate?
22. Which addressing mode is used in the following statements:
(a) `MVI B,55` (b) `MOV B,A` (c) `MOV M,A`
Ans. (a) Immediate addressing mode. (b) Register Addressing Mode
(c) Direct addressing mode

23. RS-232C standard is used in _____. Ans. Serial I/O

24. How are parameters passed to the main function?

25. What does the file `stdio.h` contain?

a) function definition b) function declaration c) both func. defn func. declaration.

26. `scanf` is used for ?

27. Memory Management in Operating Systems is done by

a) Memory Management Unit b) Memory management software of the Operating System c) Kernel Ans: (b)

28. What does the statement `strcat(S2,S1)` do?

29. TCP is Connection Oriented and used in _____ layer?

30. IP(Internet Protocol) is connectionless and used in _____ layer?

31. For LAN Network layer is not required. Why?

32. What is done for a Push operation?

Ans: SP is decremented and then the value is stored.

33. Describe the following structures as LIFO/FILO/FIFO/LILO

(a) Stack (b) Queue

Network basics

* T1(US standard)

Data rate 1.544MBPS

No of Channels 24

No of bits per frame 193 (8x24 + 1 Framing bit)

Time 125uS/Sample(for 193 bits)

* E1(European standard)

Data rate 2.048MBPS

No of Channels 32

* OSI Model

Application Layer

Presentation Layer

Session Layer

Transport Layer

Network Layer

Data Link Layer

Physical Layer

* TCP/IP Model

Application Layer

Transport Protocol(TCP/UDP/SCTP)

Internet Protocol(IP)

Physical Layer

* TCP-->Connection Oriented

Reliable

Slow

* UDP-->Connection less

Unreliable

fast

* POT(Plain Old Telephone) works with -48V

* Internet--> packet switching

PSTN --> Circuit switching

* Hamming code distance --> 5

* In Ethernet Frame length is fixed

* MAC() length is 6 bytes

* In Asynchronous communication START/STOP bits r used

* Long Distance Communication --> Satellite

* Protocol is a set of rules used for communication

between two peers

* UTP-5 (Unshielded Twisted Pair)
STP (Shielded Twisted Pair)

7. A man owns $\frac{2}{3}$ of the market research beauro business and sells $\frac{3}{4}$ of his shares for Rs. 75000. What is the value of Business. Ans.150000

10. From its total income, A sales company spent Rs.20,000 for advertising, half of the remainder on commissions and had Rs.6000 left. What was its total income? Ans.32000

18. If a salesman's average is a new order every other week, he will break the office record of the year. However, after 28 weeks, he is six orders behind schedule. In what proportion of the remaining weeks does he have to obtain a new order to break the record? Ans. $\frac{3}{4}$
