Fifth Semester Examination - 2007

## PRODUCTION AND OPERATIONS MANAGEMENT

Full Marks - 70

Time: 3 Hours

Answer Question No. 1 which is compulsory and any five from the rest.

The figures in the right-hand margin indicate marks.

- Answer the following questions:
- 2 x 10
- (a) Which type of manufacturing layout is to be followed for construction of an Hanging Bridge?

- (b) What do you understand by plant-within-aplant (PWP) concept?
  - (c) What do you understand by Decoupling Inventory?
  - (d) What do you understand by Diseconomies of scale?
  - (e) What do you understand by system based operating capabilities?
  - (f) What do you understand by Time-cost model in Project management?
  - (g) What do you understand by Fixed timeperiod model of Inventory system?
  - (h) What do you understand by the concept of Virtual Factory?
  - Write down any three advantages of Group
    Technology layout.
  - Write down any three Qualitative techniques
    applied in forecasting.

In a factory, eight jobs are performed on two machines (A and B). The time required for each job on each machine is given below. On the basis of the information, identify the optimal sequence and calculate the in and out time for each job on each machine and the total elapsed time.

Job	Work Station - 1	Work Station - 2
A	3	3
В	6	4
С	5	7
D	8	5 .
E	. 2	6
F	1	B •

3. A company involved in the manufacture of two wheelers installs a new assembly line with the objective of producing 100 units per 10 hour shift. The work elements and the relationships are as per the below mentioned table. Draw network diagram, work station cycle time, Number of work stations and distribution of work elements in a work station and the efficiency.

Work Element	Time (Minutes)	Tasks that must precede
Α .	4	
в.	3	A
G	6	Α
D	1	В
E	2	D, C
F	5	E

 A firm is selling two products, Chairs and Study tables, each at Rs. 500 per unit. Chairs have a variable cost of Rs. 250 and Study tables of Rs. 200, Fixed cost of the firm is Rs. 2,00,000.

> (a) If the sales mix is 1 : 1 (One Chair sold for every Study Table sold), what is the breakeven point in rupees of sales and in units of Chairs and Study Tables?

(b) If the sales mix changes to 1:4 (One Chair sold for every four Study Table sold), what is the break-even point in rupees of sales and in units of Chairs and Study Tables?

5 A manufacturer identifies six potential market locations in a country it plans to enter. Suggest the best possible location to the manufacturer so that it can minimize its overall transportation cost. The coordinates and volume to be moved between these locations are given in the table.

-	

P.T.O.

Potential Markets	х	Y	Volume	
LI	2004	250,	130	
12	350 -	200-	120	
L3	450-	600	115	
L4	700 -	900	100 -	
L5	230 ·	760,	100	
L6	890	450	105	

6. The Just-in-Time (JIT) purchasing system has gained significant importance in the business world in the last few years. It helps companies to reduce order size and try to time them close to their uses in production as possible. Explain how

- the JIT purchasing system is different from the traditional purchasing system?
- 7. A project has the following list of activities along with their time of completion, precedence relationship, normal and crash activity times and normal and crash costs associated with it:

Activity	Preceding	Required Time (Weeks)		Cost (Ra.)	
	Activity	Nomet	Crash	Normal	Crash
_ A		4	2	10000	11000
В	A	3	2.	6000	9000
C	A	2	7	4000	6000
b	В	5	3	14000	18000
Ε.	B, C	an l	1 .	9000	9000
F	C	3	2	7000	8000
G ·	,E,F	4	2	13000	25000
н	D, €	. 4	1	11000	18000
1	H, G	6	5	20000	29000

- (a) Draw the critical path and estimated completion time.
- (b) To shorten the project by three weeks, which task would be shortened and what would be the total project cost?
